

## Hanger condo an industry first

Weatherwise Aviation plans to open the first of four hangar condominiums for rotary and fixed-wing aircraft in May, a 40-minute drive north of Toronto at Lake Simcoe Regional Airport. The hangars are part of a two-phase project that will lead to the development of an airport business park.

Each hangar will offer three aircraft bays and will include 25,000 square feet of office space over three floors. Weatherwise will make space available using lease, rent or

buy options. The buy option is an industry first, providing options for partitioned

hangar condominium units or the purchase of an entire hangar.
